George Ciesinski

Software Developer - Toronto, Ontario
george.ciesin@gmail.com | www.linkedin.com/in/george-ciesinski | github.com/GeorgeCiesinski | georgeciesinski.dev | 647-804-9573

Software Developer experienced in building enterprise web applications across the full software development lifecycle. Develops and maintains secure, accessible, and scalable solutions, with experience owning production applications from architecture and development through deployment, maintenance, and continuous improvement while working within enterprise security and accessibility requirements.

TECHNICAL SKILLS

Frontend: React • JavaScript • TypeScript • HTML5 • CSS3 • SASS • Vite • Webpack

Backend & APIs: Node.js • Python • Flask • PHP • REST APIs • API Integration • PostgreSQL • MySQL • SAML SSO • Azure AD

CMS & DevOps: Docker • AWS • Git • npm • GitHub Actions • CI/CD • npm • Vitest • Jest • Automated Testing • Drupal 9/10 • Linux

EXPERIENCE

Humber Polytechnic — *Web Developer & Multimedia Specialist* *April 2023 - June 2026*

- Led the design, development, deployment, and maintenance of enterprise web applications supporting Humber's 86,000+ users.
- Developed custom Drupal architectures, themes, and features that improved content management workflows for enterprise users.
- Managed AWS-hosted production environments, deployments, upgrades, and security updates.
- Maintained secure, accessible, standards-compliant web applications by meeting AODA/WCAG requirements and governance policies.

New Era Technology — *Technical Support Analyst* *April 2017 - October 2022*

- Developed an internal Python app that reduced repetitive manual work for Level 1 & 2 service desk staff, and saved thousands of hours.
- Diagnosed network connectivity, endpoint configuration, and interoperability issues across enterprise communications systems.

Multimatic — *Junior Database Administrator* *May 2013 - August 2013*

- Designed an ETL pipeline integrating Kepware, MS Access, and MySQL to automate manufacturing failure tracking.

PROJECTS

Humber Enterprise Web Platforms

- Built and maintained enterprise Drupal 10 platforms across public-facing and internal applications.
- Developed custom themes, knowledge bases, and full-stack features while meeting AODA/WCAG standards.
- Implemented SAML-based SSO with Azure while delivering production enhancements and security updates.

GaleSage

- Built a full-stack weather application featuring an AI weather advisor using React, TypeScript, and Node.js, deployed to Vercel.
- Integrated Visual Crossing, Nominatim, and OpenAI GPT-5 Nano APIs for weather forecasting, geocoding, and AI-powered recommendations.
- Implemented GitHub Actions CI/CD with automated Vitest testing.

Poke-guesser-bot

- Built an interactive Discord bot using TypeScript, Deno, and Discord.js with PokeAPI integration.
- Implemented PostgreSQL persistence, Docker containerization, and GitHub Actions CI/CD with automated testing.

OPEN SOURCE

Palettey

- Submitted and merged a pull request fixing color palette generation issues and expanding Jest test coverage.
- Collaborated through GitHub pull requests and code reviews.

Text-Script *(Open Source Productivity Tool)*

- Developed an open-source Python text expansion utility with 72+ GitHub stars, 8+ forks, and external contributors.

EDUCATION

- **The Odin Project** — Full Stack Curriculum **July 2022 — Present**
- **Humber Polytechnic** — Electro-mechanical Engineering Advanced Diploma **September 2011 — April 2014**
